Langraph → Library → from Langchain

Chain

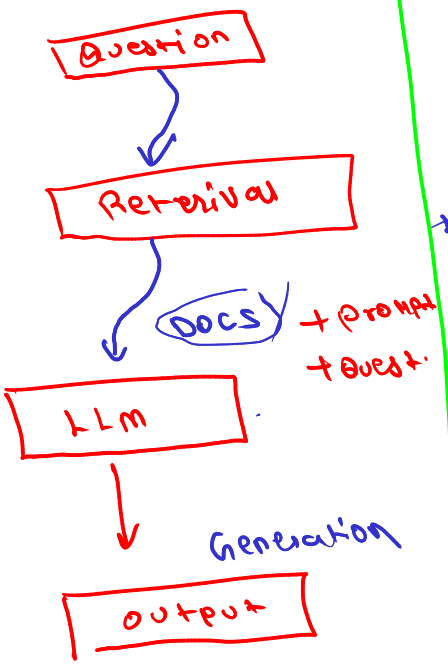

Dynamic work flow ✓

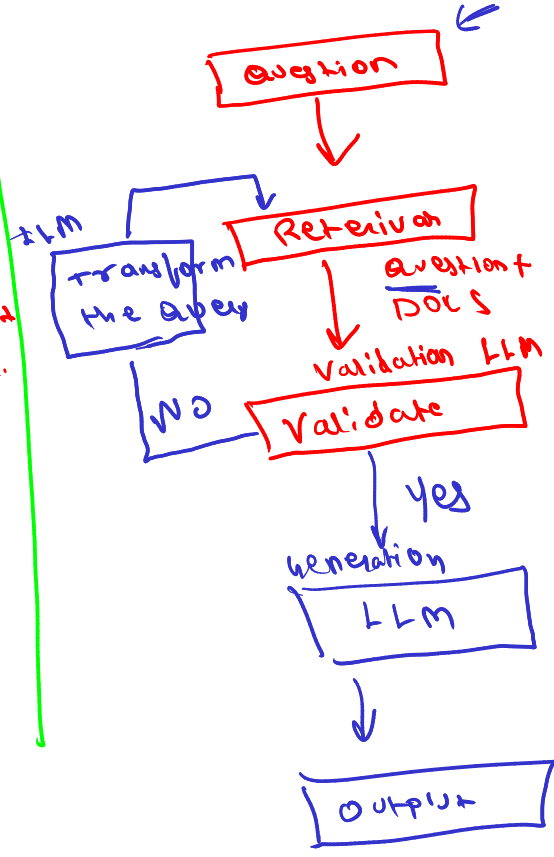

Graph base system

RAG

Langgraph

Corrective RAG

Langgraph

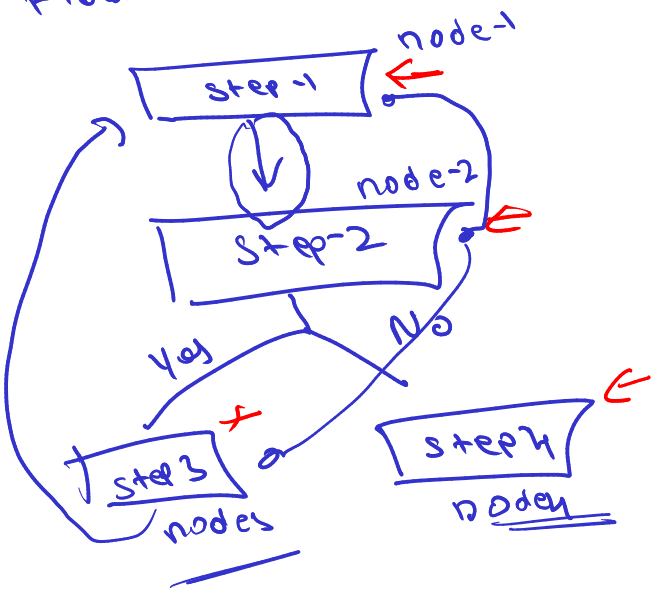

graph =

1. State → Temporary memory

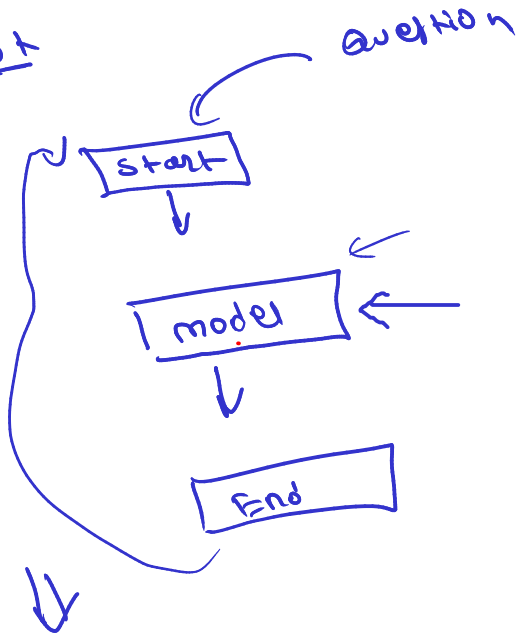

2. Node → each step in the graph

3. Edge → connection b/w the nodes
   - → Edge
   - → conditional edge

Flowchart

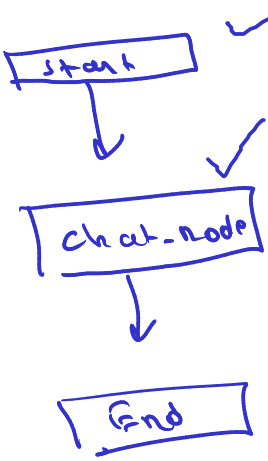

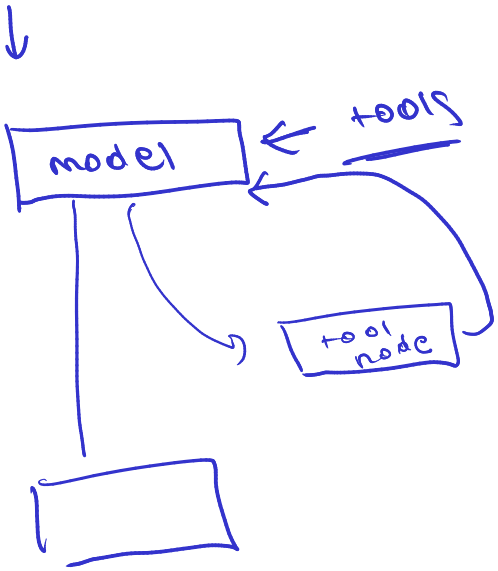

Langgraph → Chatbot

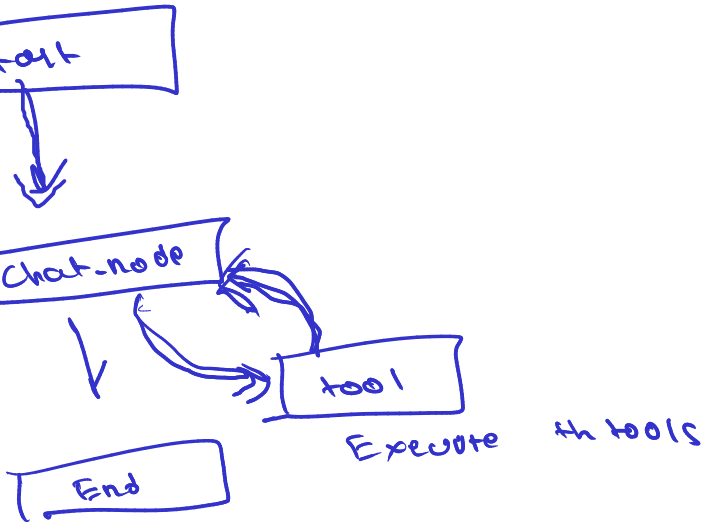

Agents

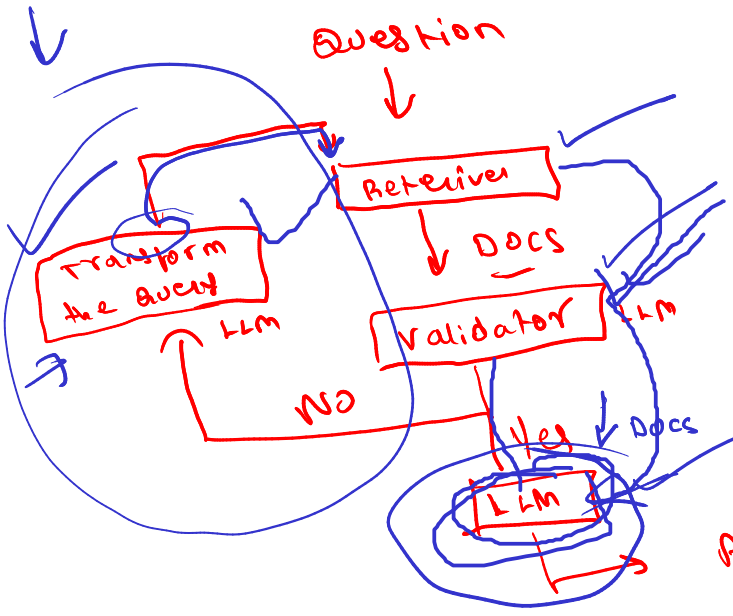

Langgraph → In memory
Langgraph → persistant memory

Corrective RAG

4 nodes
→ Retriever
→ validator
→ Rewriter
→ Generator

3 chains

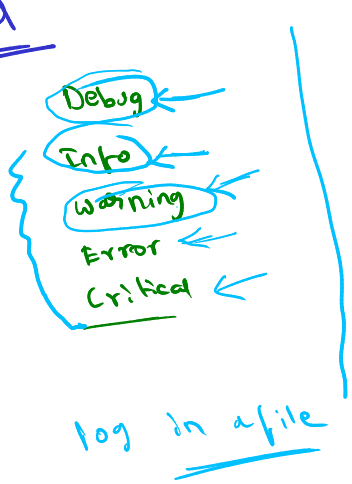

1. RAG Chain
2. Validator chain ✓
3. Question Rewriter chain

Observability & Monitoring tool

Langsmith → monitoring
→ prompt managments

python logging → logger → local → need deeper/granular logs
→ prod → minimum logs

Level

Setting up the loger
