Interacting with LLMs

Wednesday, February 11, 2026 6:01 PM

Recap

open AI - API

Created a new open AI API key

my_Test key

valid | active

Recharge Account

open API platform

Created a new key.

Store key

Access key

and how to access open AI LLM 'gpt-5-nano'

Colab

Store key → key symbol left side panel

Access API ⇒ from google.colab import user data

open_key = userdata.get('openai_clam)

Before Interact with LLM

→ assign key to Env var.

! pip install openai ✓

Def an env var Created Collab.

'OPENAI_API_KEY'

import os.

os.environ['OPENAI_API_KEY'] = open_key.

✓ Client = OpenAI( )

already stored api key into env var

✓ Client = OpenAI ( )

into env var
no need to provide any key

X Don't store api key in env var

X Client = openAI (api_key = open_key). X

Client of openAI → Interact with any open AI Large models.

→ To Interact LLM

→ Chat Completions.

```
response = client.chat.completions.create(
        model = 'gpt-5-nano',
        messages = [
          {'role': 'user', 'content' = prompt } ]
```

→ response.

→ post processing on resp.

response.choices[0].message.content

→ Answer - Query.
